

Air1 and many other translator stations I've listen to over the years have been far better radio stations than any local station. To localize would put many people without good radio staions because many citys do not have the money to support a radio station that can offer what Air1 and many other national radio stations can. Air1 is a positive station that does more than talk and play music, it is used to change lifes. If great stations like this were forced out of town it would be a very negitive effect for many people. I hope that you all will realize the benifit of these great stations and please keep them on the air. Thank you very much for your time!
